

Backup Product Reference Manuals

Manuals (Cloud and Server Management Side)

Cloud Management Console

[Introduction to the Cloud Management Console \(CMC\)](#)

[Remote access to the Backup Manager's GUI from the Cloud Management Console](#)

[Installation of the Cloud Management Console](#)

[Web Cloud Management Console](#)

[Actions: How to log into the Cloud Management Console](#)

[How to log into the Cloud Management Console: the wizard for new Resellers and End-Customers](#)

[Actions: Export in the Cloud Management Console](#)

[Actions: The preferences functionality in the Cloud Management Console](#)

[How to move devices into a subgroup in the Cloud Management Console](#)

[View: The main panel in the Cloud Management Console](#)

[View: Pie chart in the Cloud Management Console](#)

[View: Tool bar](#)

[View: Totals panel in the Cloud Management Console](#)

[Manage: Expressions for creating templates in notifications](#)

[Manage: Manage notification rules](#)

[Manage: Manage notification templates](#)

[Manage: The notification functionality in the Cloud Management Console](#)

[Manage: Product management in the Cloud Management Console](#)

[Manage: Product management: How to create a product with Virtual Drive](#)

[How to check the location of your data](#)

[Manage: View storage statistics in the Cloud Management Console](#)

[Partners: The partner management functionality in the Cloud Management Console](#)

[Contact notes: meet customers' expectations with intelligence](#)

[Partners: User management in the Cloud Management Console](#)

[Partners: Is it possible to activate the partner that once was deactivated?](#)

[Partners: How to make partners use personal nodes](#)

[Partners: How to remove a partner](#)

[Devices: Device actions audit mechanism in the Cloud Management Console](#)

[Devices: Device management functionality In the Cloud Management Console](#)

[Devices: Remote commands in the Cloud Management Console](#)

[Autotask Integration GUI Manual](#)

[Graphical charts](#)

[How to configure ConnectWise® Billing Integration in the Cloud Management Console](#)

General information

[SOAP API for Cloud Management configuration](#)

[IASO Cloud configurations](#)

[Reserve Node](#)

[Monitoring of storage nodes](#)

[SOAP Description for the Reporting Service](#)

[Cloud Management SOAP API usage examples in PHP](#)

[Error: "Unable to view session files. Error: There is no enough space on the drive"](#)

[IP addresses of IASO storage nodes - External](#)

Install or configure a Cloud Storage Node

[Upgrade your storage to a Cloud storage node – Windows](#)

[Upgrade your storage to a Cloud storage node - 64-bit FreeBSD & GNU/Linux](#)

[Installation of a new Cloud Storage Node on Windows](#)

[Installation of a new Cloud Storage Node on FreeBSD and GNU/Linux](#)

[How to update a Cloud Storage Node manually on Linux](#)

[How to reconfigure a Cloud Storage Node on Windows](#)

[How to reconfigure a Cloud Storage Node on Linux](#)

[How to configure RCG](#)

[Nginx logs rotation](#)

Dashboards

[Dashboards' Statuses](#)

[Understanding the "Total color bar " in the Cloud Management Console](#)

Branding

[Branding guide](#)

[Examples of branding files](#)

[Branding preview functionality](#)

[How to upload your branding to the Cloud](#)

Manuals (Client Side)

Installation guides

[Backup Manager installation guide](#)

[Instruction for a Linux GUI-less Backup Manager's installation](#)

[A multi-client install process](#)

Data sources guides

[How to back up MSSQL](#)

[Migration to MSSQL VSS plugin](#)

[Restore of MSSQL](#)

[MSSQL VSS Auto Recovery](#)

[Backup of network shares](#)

[Oracle Backup](#)

[SharePoint Backup and Restore](#)

[VMware Backup Plugin](#)

[VMware - Restore single files out of the virtual machine backup](#)

[Hyper-V Backup and Restore](#)

[SIMS Backup and Restore](#)

[MySQL backup and restore on Linux](#)

[Backup and restore of MySQL on Linux via ClientTool](#)

[Backup and restore of MySQL on Windows](#)

Advanced features

[Advanced Scheduling](#)

[Bandwidth Throttling](#)

[A seed loading backup \(an offline backup\) on Windows](#)

[A seed loading backup \(an offline backup\) on Linux](#)

[LocalSpeedVault Functionality](#)

[How to use Local Speed Vault on Linux for backup to NAS](#)

[Restore Cache Functionality](#)

[Restore on Desktop](#)

[Using Virtual Drive for the Exchange mailbox restore](#)

[Virtual Drive Functionality Guide](#)

[Archiving Technology](#)

[How to increase the number of simultaneous connections during a backup](#)

[Setting up scripts in the Backup Manager](#)

[Restore-Only Mode](#)

[Read-Only Mode](#)

[Connection Testing Functionality](#)

[Data Consolidation Functionality](#)

[Display of cleaning, consistency check and the backup register's download status in the Cloud Management Console and](#)

[Backup Manager](#)

[How to set priority selection](#)

[The Seed Offload functionality \(an offline restore\)](#)

[ClientTool.exe functionality](#)

[ClientTool.exe for Linux](#)

[How to set GUI Password](#)

[Seed offload \(offline restore\) at local storage node](#)

[Virtual Disaster Recovery on Windows](#)
